

# EBS-230 INK JET PRINTER

*Single Line Ink Jet Printing has Never Been So Easy*

- Easy to Operate & Program
- Robust Industrial Construction
- Large Message Storage Capacity
- Prints Graphic Symbols & Logos
- Efficient, Low Cost Operation
- Porous & Non-Porous Surfaces

Our EBS-230 DOD Ink Jet Printer is a 1-line non-contact printer that sets a new benchmark in performance and cost effectiveness.

- Choose from 2 print heads with 7 or 16 jets. Print characters from .24" to over 1" high.
- Print on a wide variety of surfaces - corrugated, bags, plastic & metal pipe, lumber, building materials, metal sheets, plastic films, etc.
- High quality printing at line speeds of up to 150 feet per minute.
- A bulk ink delivery system is used resulting in lower ink costs when compared to printers using pressurized ink bottles.
- Print functions and message management are controlled by a PC running Windows-based software or an optional touch screen controller.
- Large memory capacity allows storage of 30 messages (up to 1,300 characters per message).
- Print fixed text (part numbers, flavors, size, etc.), time and date, sequential numbers and graphic symbols.
- The EBS-230 offers the industry's widest variety of ink formulations. Water based inks for porous surfaces - corrugated cartons, kraft paper bags, etc. Tackle tough applications with one of EBS' solvent based inks formulated for marking metal, plastic, shrinkwrap and other non-porous surfaces. Pick from standard colors: black, red, blue, green, yellow or white.

**EBS-230 with T200 Terminal Controller**

# Economical Non-Contact Printing

EBS-230 with a PC using EBS' easy-to-use Windows Software. Sequential numbering shown. The EBS-230 features a reliable bulk ink supply. Ink in liter bottles, saves up to 50% vs printers using costly pressurized ink supplies. One liter bottle of ink will print up to 2-million characters (7 x 5).

The EBS-230's robust DOD print heads are available in 7 or 16 nozzle models.

The 7 nozzle head prints .24" to .47" high (6mm to 12mm); the 16 nozzle head prints .24 to 1.06" high (6mm to 27mm). Heads print on both porous and non-porous surfaces.

Ink selection is one of the industries largest. Choose from water base, Ethanol, Acetone or MEK based inks. Colors include black, red, blue, green yellow and white.

With this many ink formulas and colors most any industrial marking application will be satisfied.
