

NUMBERING & LETTERING PRESS

NAMEPLATE MARKING & KEY IDENTIFICATION

The Numberall Model 40B Numbering & Lettering Press is a simple, low cost solution for permanent stamping of nameplates and other flat metal parts. Because it's especially suited for marking keys, the 40B is used by hotels, universities and hospitals world-wide.

To operate, simply spin the dial to the desired character and press down on the lever. When the lever is released the table advances, ready for the next character. Marks are perfectly aligned, and uniform in spacing and depth. With a little practice and a few adjustments an operator can quickly produce neatly marked items.

The Model 40B Press has a handy clamping device for holding most nameplates. It will mark plates up to 5 inches wide and as far down as 4¼" inches from the top. Available in 5 standard character sizes from 1/16" (1.6mm) through 3/16" (4.8mm). Optional key nests can be furnished, just send us a sample key.
